### Resistored Anode Rod

Counters aggressive water to prolong the lifespan of the storage water heater

### Components Secured with 5-Bolt Flange

Allows for easy access to internal components during regular maintenance

### Water Inlet with Whirl Flow Diffuser

Helps regulate incoming water flow to optimise heating and provide more hot water

### High Density Polyurethane Insulation

Promotes better heat retention, which saves more energy and reduces heating time

### Blue Diamond Enamel Coating

Provides protection for inner tank to resist corrosion and ensures long-lasting performance

### Incoloy Heating Element

Withstands high temperatures and resists dry firing while ensuring fast heating

### LEFT MOUNTED

### RIGHT MOUNTED

### Thermal Cut Off

Prevents overheating or scalding from occurring

### Universal Service Panel

Provides flexibility during installation and easier maintenance

### Universal Mounting Bracket

Allows for simple and easy mounting and installation

### ELCB (optional)

Helps to provide protection against electrical shocks

# INTUITIVE, VERSATILE AND SOPHISTICATED

**Elevate your shower experience and enjoy greater convenience**

Elevate your shower experience by utilising the EHG Smart WiFi's smart heating capabilities, heating schedule options and temperature adjustment functions, which can be controlled seamlessly and effortlessly through your mobile phone.

Simply download the Rheem SEA mobile application to unlock all the benefits the EHG Smart WiFi series has to offer. With its simple and intuitive interface, you can easily navigate through the different modes available and make quick and easy adjustments to suit your shower preferences and needs.

## **EHG Smart WiFi Storage Water Heater Series**

Download 'Rheem SEA' mobile application free below

### **Eco Smart Mode**

Optimise your water heater by enabling 'Eco Smart Mode' and letting your water heater learn your shower habits to operate more efficiently

### **Timer Mode**

Use the timer mode to set your desired start and end heating time for your water heater

### **STD Mode**

Use the STD mode to choose your desired heating temperature from 30°C to 75°C

### **Power Status Notifications**

Receive real-time notifications on your phone whenever your water heater power status has changed

**Rheem SEA Mobile Application**

# Slim Design suitable for tight ceiling spaces

\*Length of A is from the end of the water heater to the tip of the control panel
